

### ***Placement Statistics for All Children in Alaska OCS Out-of-home placement on July 31, 2006.***

Out-of-home placement is the last option considered when reasonable efforts to protect a child in his or her own home have been exhausted by OCS. The first preference considered in all out-of-home placements for a child or youth is a relative's home. When it is not possible to place a child with a relative it is necessary to place the child in a licensed foster home. Residential care facilities may offer short-term emergency shelter as well as more long-term residential treatment.

#### ***Average Statistics of Children in Out-of-home placement on July 31, 2006, by Region.***

	<b>Anchorage</b>	<b>Northern</b>	<b>Southcentral</b>	<b>Southeast</b>	<b>Statewide</b>

Mean Time in Care	665.3	651.9	615.2	471.1	654.8	
Median Time in Care	508.0	519.0	455.0	112.0	500.0	

Mean is the arithmetic mean average, commonly referred to as the 'average'.

Median is the median average, containing the middle value. Half of the observations are less than this value, and half of the observations are greater than this value.

Placements are the number of times children in OCS Out of Home placement have changed homes.

Time in Care is measured in days.

Data Source: ORCA. Program used to tabulate statistics: monthlyreport.sas.

Data in this report is as of July 1, 2008. Subsequent reports with the same date parameter will contain up-dated statistics.
